Xiaomi Massage Gun User Manual

Product Overview

Read this manual carefully before use, and retain it for future reference.

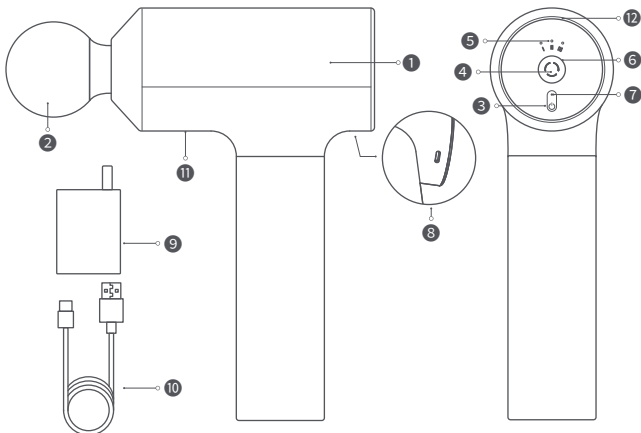

Massage Gun Uses

Relieves muscle soreness and tightness after exercise.

Alleviates muscle soreness and tightness in the neck, shoulders, and waist due to sedentariness.

Helps muscles relax through daily massage.

Massage Heads:

Round Head

Flat Head

Bullet Head

Round head: Suitable for massaging larger muscle groups including arms, back, glutes, thighs, and calves.

Flat head: Suitable for relaxing all different muscles.

Bullet head: Suitable for targeting deeper tissues, including meridians, palms and soles of the feet.

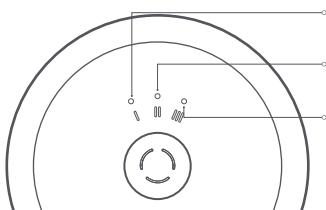

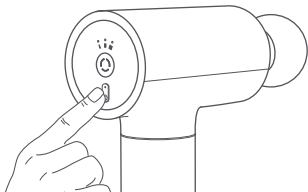

How to Use

Turning on

Press and hold the power button to turn on the massage gun.

3 Speeds

The Xiaomi Massage Gun has three speeds for different types of massages. You can choose the appropriate speed based on the level of intensity you desire, and it is recommended to try from the lowest speed.

Speed 1: 1800 /min for a soft and relaxing massage

Speed 2: 2400 /min for the post-exercise relief

Speed 3: 3200 /min for a deep tissue massage

Switching Speeds

The massage gun automatically starts at speed 1 after being turned on.

Press the speed button while the massage gun is on to cycle through the speeds of 1, 2, and 3.

Pausing the Massage Gun

While in use, press the power button to pause the massage gun. Press again to continue using it.

Turning off

Press and hold the power button until the massage gun turns off.

When paused, the massage gun will automatically turn off after 10 minutes of inactivity.

To protect the battery, the massage gun will automatically turn off after 10 minutes of use, excluding pausing durations. To continue using the massage gun, you can turn it on again.

Using the Massage Gun

Before using the massage gun, make sure that all body parts to be massaged or the thin clothes you wear are clean and dry.

Step 1: Install a massage head

Install an appropriate massage head for the desired type of massage.

Insert the massage head into the muzzle of the massage gun till it reaches the end, ensuring that the line on the head is flush with the muzzle.

Step 2: Use the massage gun

Turn on the massage gun and choose an appropriate speed. Place the head against the target muscle group and apply the desired level of pressure. Slowly move the massage head across the muscle group and stay at each pressure point you feel sore for 30 seconds. Do not massage for more than 10 minutes.

* The massage gun will exert pressure on its own, so there is no need to apply too much pressure on it.

* Do not use the massage gun on bones, joints and arteries.

Step 3: Maintain and clean the massage gun

Remove the massage head from the massage gun and wipe both the massage head and the massage gun with a moistened towel. Then wipe both the head and the gun dry with a dry cloth and place them back in the storage case.

Store the massage gun in a dry, well-ventilated area away from corrosive gases.

Do not use corrosive liquids to clean the massage gun, as this may damage or crack the massage gun, or change its color.

The massage gun can be transported in cars, trains, ships, and planes. It should be secured in place facing upwards to prevent damage from vibrations, collisions, rolling, and falls during transport.

Indicators

All indicators will light up when the massage gun is turned on. After 1 second, only the power indicator and speed 1 indicator will remain on.

Speed Indicators

The speed 1 indicator will turn white by default when the massage gun is turned on.

Pressure Sensor Indicator

When no pressure is applied, the indicator will remain off.

When normal pressure is applied, the indicator will turn white.

When too much pressure is applied, the indicator will turn orange.

If overheating protection is triggered, the indicator will blink red and the massage gun will turn off after 10 seconds. When this happens, check whether the massage gun is too hot and whether its air inlet or air outlet is blocked. Wait for the massage gun to cool down for 5 minutes before turning it on. If the issue persists, please contact the after-sales service department for help.

Battery Level Indicator

Message Gun Status	Indicator Status	Battery Level
Operating Status	Remains white when the massage gun is on.	>20%
	Remains orange when the massage gun is on. Please charge it immediately.	0% < Battery level ≤ 20%
	The massage gun cannot be turned on and the indicator blinks orange 5 times. Please charge it immediately.	0%
Charging Status	While charging, the indicator breathes orange to show that the charging is normal.	<100%
	When fully charged, the indicator turns white.	100%

Charging

Turn off the massage gun, plug the Type-C charging cable into the charging port of the massage gun, and then connect the cable to a power supply. The massage gun cannot be turned on while charging.

When charging the massage gun after it is turned off, check whether the massage gun or the power adapter has overheated if the battery level indicator does not light up normally. If so, unplug the Type-C charging cable from the massage gun and let the gun and the power adapter cool down for 2 hours, and then try charging again. If the issue persists, please contact the after-sales service department for help.

If the Type-C charging cable is connected to a power supply and plugged into the charging port of the massage gun while it is on, the massage gun will automatically turn off and start charging.

Important Information

Warnings

Caution: Stop using the massage gun immediately if any discomfort is felt.

Do not use the massage gun on wet or dirty skin or on sweaty clothing, as this may reduce the massage gun's service life.

KeeP fingers, hair or any other body part away from the shaft and underside of the massage head as pinching may occur.

Do not block the air inlet or air outlet of the massage gun while using it.

Do not immerse the massage gun in water or allow water to enter its air inlet or air outlet.

Do not place the massage gun near a source of fire or throw it into fire.

Do not use any chargers other than the one supplied with the massage gun.

Do not dismantle or modify the massage gun on your own.

Do not hit, shake or drop the massage gun.

Groups that are not suitable to use this massage gun

The massage gun should not be used by minors. It is not a toy, and incorrect use of it may lead to injury.

The massage gun should not be used, cleaned or maintained by minors without supervision of their parents or guardians.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

This appliance contains batteries that are only replaceable by skilled persons.

For the purposes of recharging the battery, only use the detachable supply unit provided with this appliance.

The following persons should only use the massage gun after consulting with a doctor:

Pregnant or breastfeeding women

Persons with a pacemaker or implantable defibrillator

Persons who have recently undergone a surgery and have metal implants

Persons with spine, joint or bone related issues

Persons with any disease-related complications (such as neuropathy or retinal

damage)

The massage gun should not be used on the following areas

The area above the neck, armpits and any other areas with less muscle coverage, as well as areas close to organs and the aorta.

Bones and joints. The massage gun should only be used on muscular soft tissues without causing pain or discomfort.

Any bruised, injured or uncomfortable areas.

Precautions

Strictly follow all the instructions in the user manual to use this massage gun to massage.

Before using the massage gun, check to ensure that it operates correctly as indicated by this user manual.

After using the massage gun, clean and dry the massage gun and the massage head immediately to prevent the buildup of sweat and grease.

Do not use the massage gun for more than 1 hour at a time.

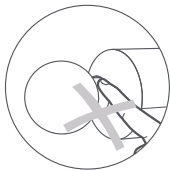

Do not use the massage gun on the same area of the body for more than 60 seconds.

Do not turn on the massage gun without a massage head installed.

Do not use the massage gun while it is charging.

Unplug the massage gun from the charger after it is fully charged.

When the massage gun is turned on, do not touch the area as illustrated as pinching may occur.
